Not worth using. Toxic community to play in, and you have to pay to play.. i got error #113 when launching esea. They asked me write in command line bcdedit /deletevalue nointegritychecks - i wrote it and r.i.p. windows. Thanks ESEA.. okay so, you can get the product only for it to tell you "you need premium" guys at ESEA listen, its not premium if you need it, or else csgo is a premium game because you need to buy it, premium is something that you pay for to get more to the game, more to the software, do you understand? dont say premium when you need it. duh.. Top BitCoin Miner. Rly nice.. Best rootkit I've ever voluntarily used.. If you have no credit card this is the way to go 10/10 IGN. I hit the yes button. Pure. Always trolls, made a video about it: ESEA Vs Faceit. Not worth buying trolls every game, very toxic and karma system is just gonna be there to f*ck you up with trolls on team. Would use 6.99 for s f*ck this. Avoid at all costs

ESEA Website Redesign : ESEA has improved leaps and bounds over the last years with a redesigned ESEA Client and shocked the cheating underground with the most advanced anti-cheating technology updates including detecting hardware cheats. At the same time, we have released industry first updates such as .Clips that allows you to share your favorite highlights with a simple in-game command and leaderboards allowing players to track their own advanced statistics. Additionally, weve recently created new Rank Leaderboards and doubled our pug prizes for players across every level from Ranks A through D up to \$160,000 a year! Today we are happy to bring you the first iteration of our next big project: redesigning the ESEA website! This initial launch brings a more modern feel to parts of our website, while adding to its existing functionality. However, we are far from finished. We intend to continue updating high interest pages on the website in order to create a more seamless browsing experience, as well as provide more depth to specific features. Stay tuned for more to come! We would love to hear what you think about the redesign, including features you would like to see added moving forward, constructive criticism regarding current changes, or any bugs that you may encounter. We are always looking for ways to improve your experience, so please let us know via the forums or a suggestion support ticket! Complete details on the website redesign project and additional updates can be found on the ESEA Blog linked below. ESEA Blog [blog.esea.net]
